

KNITTED WIRE MESH TAPE

The range:

Knitted Wire Mesh Tape is made with round wires from diameter of 0,05 up to 0,3 mm.
 Texture is made up of meshes interdependent the ones of the others.
 Knitting is the intermediate product between the braid and fabrics.
 Width (flat): 10 to 500mm & Diameter: 6,5 to 318 mm

Concept and design:

The FORISSIER Knitted Wire Mesh Tapes are mainly used to wrap cable in order to grand an EMC/RFI screening.

SCOPE OF APPLICATION

- Screening of electrical power, control, communication and data cable,
- Earth continuity in cable joints,
- Mechanical protection...

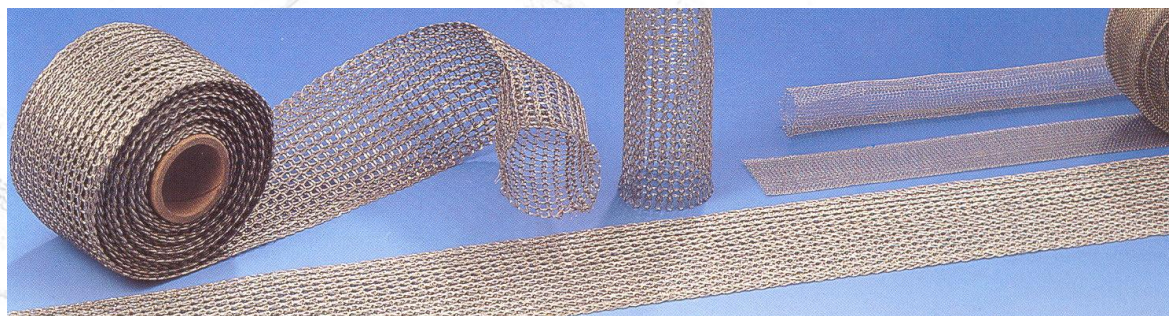

Standard Stocking Knitted Wire Mesh Tape:

Reference	Material	Width (mm)	Diameter (mm)	Length (m)	Weigth (gr)	Construction
13159	Tinned Copper	25	16	50	11	1 wire of Ø 0,13
13141	Tinned Copper	25	16	50	9,5	1 wire of Ø 0,12
13158	Tinned Copper	50	31	25	73	5 wires of Ø 0,15
13301	Tinned Copper	50	31	50	18	1 wire of Ø 0,12
13511	Tinned Copper	58	37	25	70	4 wires of Ø 0,12
13122	Tinned Copper	60	38	50	27	2 wires of Ø 0,12

Feel free to ask us for any other materials, dimensions, packaging...

Choice of materials:

Standard solution: Tinned copper, plain copper, aluminium, stainless steel.
 On request: nickel plated copper; galvanised steel, other ferrous and non ferrous materials...

Packaging:

Reels carried out on chucks of diameter 27mm and protected under retractable plastic film. Possibility to supply in pre-cut lengths
